

## Content Security - Security Appliances

*"You just set it and forget it.  
eSafe is constantly downloading,  
constantly updated.*

*We don't have to worry about  
finding Web sites to block, it does  
it for us.*

Hankins & Anderson, Inc.

### Power, Security and Availability Without Compromise

Today's security and compliance requirements demand having the right product with the right platform and the best service. As we know, security is as strong as its weakest link. This is why we have built the eSafe Secure OS from the ground up, delivering an optimal security and performance platform to meet the most demanding requirements. As availability is a hard thing to come by, eSafe SmartSuite builds on best of breed, internationally available hardware platforms and offers worldwide, next-day on site business service.

With modular offerings, scalable deployment, simple integration and intelligent tools, eSafe SmartSuite delivers the intelligent security platform that simply integrates the perfect combination of protection, reporting and analytics – built for your business. eSafe SmartSuite helps organizations to enforce acceptable use policy, protect information assets, improve productivity and gain insight to their business. And it's simple to build just the right eSafe solution for your business. Choose products, features, platforms and deployment options that suit your organization's requirements, with the peace of mind that your solution can evolve and integrate seamlessly as your needs change and your business grows.

### eSafe XG Appliance Series – Future-Proof Your Network NOW

eSafe XG appliance family is a turn-key secure solution available on a wide range of platforms that meet your business needs. eSafe is also available as a virtual appliance for third party certified hardware or as a VMware™ virtual appliance pre-built solution.

### All eSafe XG appliances are designed to be:

- **Simple:** eSafe XG appliances are pre-configured with best practices security policy settings, straightforward setup, and fully customizable to your needs.
- **Reliable:** Purpose-built, robust and highly reliable, eSafe XG appliances include high availability and failover technology with a built-in fail bypass option, as well as firmware restore and upgrade.
- **Scalable:** A single eSafe XG appliance can support thousands of users, and a patented, inline cluster mode allows connection of multiple appliances for transparent load balancing.
- **Manageable:** eSafe XG appliances feature centralized management through an intuitive interface console, which provides clear reporting data and access to essential tools for ongoing review and analysis of network traffic, employee productivity and policy compliance.

## SafeNet Appliances – One for every need

<b>XG110</b>	Ideal for SMBs and branch offices	Supports up to 700 users
