

The Ultimate Solution for Securing Access to Your Network and eBusiness Solutions

Benefits

- Secure storage of users' credentials, keys and sensitive information
- High level of identity assurance: private keys are never exposed outside the eToken Smart Card
- Simple deployment: out-of-the-box connectivity to security applications via standard security interfaces
- Straightforward integration with third party applications using eToken development tools
- Support for custom applications on the Smart Card via on-board Java applets
- Private labeling and color options for brand enhancement

eToken PRO Smart Card, SafeNet's certificate-based authentication token in card form, offers highly secured strong two-factor authentication ensuring authorized user access to sensitive corporate networks and online business applications, as well support for advanced solutions such as digital signature and pre-boot authentication.

eToken PRO Smart Card can generate and store users' personal credentials, such as private keys, passwords and digital certificates, inside the protected environment of the smart card chip. To authenticate, users must supply both their personal eToken device and eToken password, providing a critical added level of security to your digital business resources.

eToken PRO Smart Card is a multi-purpose security token that easily fits into a user's wallet. Supporting a range of security applications including secure remote access, network logon, physical access, digital signature, pre-boot authentication – and more - eToken PRO Smart Card is the ultimate security solution for organizations' diverse needs. In addition, it supports customized branding and printing on the smart card.

Future Proofed and Scalable with Centralized Management Control

eToken PRO Smart Card integrates seamlessly with third party applications through eToken development tools, supports all eToken PKI and password management applications and software development tools, and allows customization of applications and extension of functionality through on-board Java applets. It's also supported by eToken TMS, SafeNet's authentication management platform, which reduces IT overhead by streamlining all authentication operations including deployment, provisioning, enrollment and ongoing maintenance, as well as offering support for lost tokens.

Features

- Highly secure smart card chip; Common Criteria certified
- On-board RSA 1024-bit and 2048-bit key generation, authentication & digital signing
- Standard Microsoft CAPI and PKCS#11 support
- Secure storage and robust file system
- Integrated secure logical and physical access with proximity coils embedded in the eToken devices
- Flexible printing, magnetic stripe, and badging options

Operating systems	Windows 2000/XP/2003/Vista; Linux Mac OS X (32K and 64K token models only)
API & standards support	PKCS#11 v2.01, Microsoft CAPI, PC/SC, X.509 v3 certificate storage, SSL v3, IPSec/IKE
Smartcard memory size	32K, 64K (Siemens CardOS) 72K (Java Virtual Machine)
Flash memory options	512MB, 1GB, 2GB, 4GB
On-board security algorithms	RSA 1024-bit / 2048-bit, DES, 3DES (Triple DES), SHA1
Security certifications	Common Criteria EAL4+/EAL5+ (smart card chip and OS) <i>(Certifications differ per model; please inquire)</i>
ISO specification support	Support for ISO 7816 1 to 4 specifications
Memory data retention	At least 10 years
Memory cell rewrites	At least 500,000

Enabled Security Services & Applications

- Secure remote access (VPN/ Web)
- Network logon
- Digital signature
- PC Security: boot protection & file encryption
- Combined secure physical and logical access

The SafeNet Family of Authentication Solutions

SafeNet's suite of authentication solutions includes certificate-based, OTP, hybrid and software authenticators. All authenticators, together with SafeNet's extensive management platforms and security applications, empower you to:

- **Conduct business securely and efficiently** and open new market opportunities with innovative products that enable secure remote access and advanced security applications such as certificate-based authentication, digital signing and pre-boot authentication.
- **Reduce risk** with strong authentication solutions that prevent fraud and data theft and enable compliance to industry regulations.
